FAMILY PRESERVATION  
COMMUNITY REFERRALS

## Family Preservation Mission:

DCCCA Family Preservation believes in empowering parents to be self-sufficient. We focus on building family strengths as well as promoting safety and well-being.

## DCCCA's Approach:

In-home services are facilitated by either a therapist or a case manager and support worker. Typically, services are provided for one to three hours a week.

- Families are assisted in overcoming challenges, identifying personal resources and strengths, and working toward goals.
- Immediate crises such as safety, housing, food, financial, mental health, and substance use are addressed.
- Families are connected with long-term community resources.

## What families would benefit from Community Referral?

A wide variety of families would benefit from Community Referral services. The most successful are those families that are willing to engage in services to reduce the risk of children entering the foster care system. Examples include:

- Families that are in immediate crisis and need temporary support
- Families that have been in long-term crisis patterns that are causing chronic complications
- Parents with substance abuse needs, who may be referred before, during, or after treatment
- Families that have had previous experiences with the child welfare system
- Young mothers who are pregnant
- Families that are experiencing potential truancy concerns
- Families that are on Community Mental Health Center wait lists
